

AMAZON FBA

Rules & Product Selection — FBA

1. What FBA Selection Means

FBA is a **scale-up decision**, not a launch decision.

Only move a product to FBA after it has demonstrated proven sales performance under FBM.

To qualify for FBA, an ASIN must:

- Pass **all 4 qualifying rules**
- **Not already be in FBA**
- Meet all applicable exclusion and verification requirements

One failed rule = Do Not Select for FBA.

2. Step 0 — Exclude ASINs Already in FBA

Before checking the 4 qualifying rules, first identify ASINs that are already active in FBA.

FILTER FIRST

1. Pull the current FBA ASIN list.
2. Compare it with the FBM candidate list.
3. Remove every ASIN that is already in FBA.
4. Only **FBM-only ASINs** continue to the 4-rule check.

Decision

Already in FBA → Exclude → No Action

3. The 4 Qualifying Rules

A candidate ASIN must pass **all 4 rules** to qualify for FBA.

#	Rule	Requirement	Verify Via
1	Rating	4★ or above	Amazon Listing
2	Sales — Last 30 Days	5+ units sold	Business Reports
3	Net Margin	45% or above	Profit / FBA Calculator
4	Stock Level	Above 20 units	Inventory System

Qualification Rule

All 4 Rules Passed + Not Already in FBA = FBA Eligible

4. Do Not Send to FBA

The following products should not be selected for FBA, even if they appear to pass the 4 qualifying rules.

EXCLUDED PRODUCTS

- **Already in FBA** — Exclude at Step 0.
 - **Previously removed from FBA for 180+ days with no sales** — Unless there is clear evidence of expected demand in the next cycle. **(Check FBA History)**
 - **Overweight or oversized** — May result in higher FBA fee tiers. **(Check Weight Attribute)**
 - **Fragile / crystal products** — Higher breakage risk. **(Check Fragile Attribute)**
 - **High damage or return history** — May reduce profitability through returns and claims. **(Check Return Report)**
 - **No individual ASIN rating** — Only a parent/listing-level rating is available.
-

5. FBA Selection Workflow

Run every candidate ASIN through the following sequence:

STEP 0

Already in FBA?

- Yes:  **Already in FBA — No Action**
- No: Continue

STEP 1

Rating ≥ 4 ★?

- No:  **Not Eligible**
- Yes: Continue

STEP 2

30-Day Sales ≥ 5 Units?

- No:  **Not Eligible**
- Yes: Continue

STEP 3

Net Margin $\geq 45\%$?

- No:  **Not Eligible**
- Yes: Continue

STEP 4

Stock > 20 Units?

- No:  **Review Stock**
- Yes: Continue

STEP 5

All 4 Rules Passed?

- Yes:  **FBA Eligible → Send Notification**
- No:  **Do Not Select**

6. Decision Reference

Condition

Decision

Already in FBA	 Excluded — No Action
Rating $\geq$ 4★	Continue
Rating $<$ 4★	 Do Not Select
Sales $\geq$ 5 Units / 30 Days	Continue
Sales $<$ 5 Units / 30 Days	 Do Not Select
Net Margin $\geq$ 45%	Continue
Net Margin $<$ 45%	 Do Not Select
Stock $>$ 20 Units	Continue
Stock $\leq$ 20 Units	 Review Stock
Oversized / Overweight	 Avoid
Fragile / Crystal	 Avoid
High Damage / Return History	 Avoid
No Individual ASIN Rating	 Do Not Select
All 4 Rules Passed	 FBA Eligible → Notify

7. Key Reminders

Data-Driven Selection

Base FBA decisions on actual FBM sales performance and Business Reports data.

Protect Margin

Maintain a minimum **45% net margin**.

8. FBA Selection Tracking — Final Output

Use this table to record the final decision for every candidate ASIN.

ASIN	Product Name	Current Stock	30-Day Sales	Rating	Net Margin	Already in FBA?	Size/Weight Verified	FBA Status	Action
B0XXXXXX X	Product A	50	8	4.5★	52%	No	Yes	 FBA Eligible	Add to FBA
B0XXXXXX X	Product B	35	7	4.3★	48%	Yes	Yes	 Already in FBA	No Action
B0XXXXXX X	Product C	15	6	4.2★	50%	No	Yes	 Review	Check Stock
B0XXXXXX X	Product D	40	2	4.1★	42%	No	Yes	 Not Eligible	Do Not Send
